DESCRIPTORS	College Programs; *Community Colleges; Day Students; *Enrollment; *Enrollment Trends; Evening Students; *Intellectual Disciplines; *Multicampus Districts; Tables (Data); Two Year Colleges
IDENTIFIERS	*Los Angeles Community Colleges CA; *Weekly Student Contact Hours

ABSTRACT

Day, evening, and total weekly student contact hours (WSCH) reported each Fall from 1975 to 1979 are presented in a series of data tables for the Los Angeles Community College District and each of its nine member institutions. First for the District and then for each of the colleges, tables provide WSCH figures for 23 academic disciplines and for each instructional program within those disciplines. Percentages of increase or decrease from one year to the next are also indicated. These data reveal, among other findings, that the ten most popular disciplines within the district between 1975 and 1979 were business and management, education, fine and applied arts, social science, letters, engineering, mathematics, physical science, psychology, and health occupations. During 1978-79, computer science experienced the largest gain in WSCH (+24.4%), while social science and psychology showed the largest declines (-20.3% and -16.5%, respectively). The study also reveals that in 1979 the District offered a total of 212 instructional programs, compared to 229 in 1975; and that during this period 18 new programs were added and 35 programs were dropped. The report includes a listing of the courses that were added or deleted and a classified outline of the District's disciplines and programs. (JP)

GLOSSARY

Census is a fixed time during the semester when counts of enrollment and weekly student contact hours are taken for State reporting purposes. There are currently two census weeks per semester.

Classification of Instructional Disciplines (CID) codes are a system of four-digit numbers used throughout California for the classification of disciplines and instructional programs. CID codes define 23 major disciplines as distinguished by the first two digits of the code. Specific instructional programs within each discipline are identified by the last two digits of the code.

Day classes are those classes beginning before 4:30 p.m.

Disciplines are major subject fields composed of a number if instructional programs.

Evening classes are those classes beginning at 4:30 p.m. or later.

Full-time Equivalent (FTE) Enrollment is derived by dividing WSCH by 15. One full time equivalent student represents 15 credit hours in scheduled instruction.

Instructional Programs or Programs are organized sequences of courses covering related subject matter and comprising a Discipline.

Weekly Student Contact Hours (WSCH) are computed by multiplying the number of students enrolled in a class by a number of hours per week for which the class meets. A class with ten students which meets three times a week would thus generate 3 x 10 or 30 WSCH.

INTRODUCTION

This report presents weekly student contact hours (WSCH) in disciplines and instructional programs for the District and for each college in the District. Data are presented for both day and evening classes for the fall semester of each academic year from 1975 to 1979. It is intended that these data will serve as a reference to colleges in the areas of curriculum planning, faculty workload analysis, and resource allocation.

Data are presented for each instructional discipline as well as for each program within the discipline, as identified by Classification of Instructional Discipline (CID) codes. The terms "discipline" and "instructional program" as used in this report are explained in the Glossary. A complete list of the instructional programs comprising each discipline is provided on pages 4 through 10.

Data were taken from the WSCH by Subject Report. Information on that report is provided by the Colleges via their input to the Section Data Base.

For the purpose of this report, programs "added" refers to those programs generating WSCH for the first time. Similarly, programs "dropped" refers to those programs which have stopped generating WSCH. Between Fall 1975 and Fall 1979 the District added 18 new programs and dropped 35. A listing of the programs added and dropped is provided on pages 11 through 13. The college at which the program was first added or from which it was last dropped is also included. In Fall 1979 the District offered a total of 212 instructional programs, compared to 229 in Fall 1975.

WSCH from 1975 to 1979 in the District's ten largest disciplines are presented in Figure 1. During the five year period, the District has the same largest top nine disciplines. Biological Science (0400) was replaced by Health Professions (1200) in the tenth place in 1976. Business Management (0500) has been the District's largest discipline each fall since 1973. Within this discipline, programs showing the largest gains in 1979 include Business (0501), Finance (0504), Management (0506), Restaurant Management (0508), Labor Studies (0516), Telephone P B X (0594), and Foreign Trade (0596).

In Fall 1979, Education (0800) was the second largest discipline in the District. The largest increases are found in Special Education (0808), Physical Education (0835), and Cooperative Education (0850).

Computer Science (0700) showed the largest gain this year (24.4%) due to increasing enrollment in Business Data Processing (0703), and Computer Technology (0730). The programs had increases of 26.7% and 35.1% respectively. The largest percentage decline (-8.2%) was in the Public Affairs and Services (2100) discipline; however, the largest declines in total numbers of WSCH occurred in Social Science (2200) and Psychology (2000).

Enrollment and Attendance: 1975-1979.

Districtwide WSCH information may be found on pages 16 through 83 Data for disciplines are presented prior to data for instructional programs within those disciplines. Data for individual District colleges follow the District section, with each college printed on a different color of paper.
